INTERNATIONAL COFFEE DAY
OCTOBER 1
Sustainable Brazil

Responsible action contributes to the conservation of natural resources, encourages environmental, social and economic improvements and responsibility and promotes good relations with the community. BSCA acts together with its members to ensure sustainable practices throughout the entire coffee value chain.

Promoting specialty coffees from all Brazilian regions. This is our commitment to the development of this market, working with transparency and sustainability to stimulate the advancement of quality production in the country and meet growing global demand.

Through certification, BSCA promotes the best Brazilian beans, coffees that have won over the world.

The Brazil Specialty Coffee Association (BSCA) was founded in 1991 by a small group of forward-thinking coffee entrepreneurs who recognized the potential of investment in quality. Today, BSCA is recognized as Brazil’s national authority representing specialty coffee.

BSCA achieved this status because it was responsible for changing international perceptions about Brazilian coffee. As the world’s largest producer and exporter, the country had been seen as a supplier of quantity. The Association broke this paradigm and today we are a valued partner to our worldwide customers.

The largest producer and exporter of coffee in the world also stands out for quality. Brazil’s large expanses permit diversified cultivation with very complex characteristics of the drink.
